Month of verification:	March 2018

Findings

Good Practice Principles	Description of compliance with the Principles
<p>1 The Buyers and Sellers of digital display advertising shall ensure that the transaction is one pursuant to either (a) a Primary Agreement or (b) the specific terms and policies within an agreed or signed contract.</p>	<p>Digital display advertising transactions are governed by AdRoll’s standard Terms and Conditions which are reference via an AdRoll Insertion Order (IO), Master Service Agreement (MSA) or, for self-serve clients, the signup setup.</p> <p>AdRoll’s standard Terms and Conditions are available to view here: https://www.adroll.com/en-GB/about/terms</p> <p>AdRoll also have signed agreements with Exchanges and SSPs</p>
<p>2 A Primary Agreement, or the specific terms and policies within an agreed or signed contract, should include the Buyers and Sellers’ intention as to where the advertising should (or should not) appear.</p> <p>The Buyers and Sellers should select from one or both of the following means to minimise ad misplacement:</p> <ul style="list-style-type: none"> A. Independently-certified (to JICWEBS standards) Content Verification (CV) tool (criteria agreed between the Buyer and Seller pre-delivery); or B. Appropriate / Inappropriate Schedules (criteria agreed between the Buyer and Seller pre-delivery). 	<p>AdRoll IOs contain a statement that the IO is subject to AdRoll’s Terms and Conditions and also contains a link to their Brand Safety Policy.</p> <p>For self-serve clients the signup setup states “By submitting this form you accept our Terms of Service”. They also receive an email which contains a link to the Brand Safety Policy.</p> <p>Both AdRoll’s Terms and Conditions and their Brand Safety Policy contain details of inappropriate content websites where advertising should not appear.</p> <p>AdRoll has an inappropriate schedule (blacklist) which is run across all campaigns.</p> <p>Buyers can also provide AdRoll with their own blacklist to run against their campaigns.</p>

Good Practice Principles	Description of compliance with the Principles
<p>3 Sellers should confirm the specific provisions applied to minimise the risk of ad misplacement, irrespective of whether inventory is sourced directly or indirectly. In the absence of specific provisions, then as a minimum, a statement of reasonable endeavours is required.</p>	<p>AdRoll confirms the specific provisions applied to minimise the risk of ad misplacement in their Brand Safety Policy which states:</p> <p>“AdRoll provides targeted advertising services for our advertiser clients and uses both exchanges and SSPs in order to ensure we deliver ads in a safe manner. AdRoll buys inventory across a wide range of websites, through a number of ad exchanges and supply side platforms (all of which vet their inventory partners).”</p> <p>The Brand Safety Policy is located at the following link https://www.adroll.com/about/trust-center/brand-safety</p> <p>A link to the Brand Safety Policy is also included on AdRoll’s insertion orders and self-serve signup.</p> <p>AdRoll communicates the processes and procedures to minimise the risk of ad misplacement via their brand safety policy.</p>
<p>4 Sellers should be able to explain the process(es) that form the basis of specific provisions and/or the reasonable endeavours.</p>	<p>AdRoll’s Brand Safety Policy explains the processes applied to minimise ad misplacement as follows:</p> <p>“AdRoll works only with partners who thoroughly test and monitor their sellers against common brand safety criteria to minimise ad placements on websites including but not limited to promoting the following content:</p> <ul style="list-style-type: none"> • Nudity, Pornography, Adult Content • Copyright Infringement • Graphic Violence • Criminal Activity • Weapons • Malware • Hate Speech” <p>“AdRoll uses a third party service, Pixalate, for ad verification purposes. Pixalate measures and reports on invalid traffic, brand safety and viewability. This information is used to inform our bidding and curate global domain blacklists. End goal being to provide our customers with safe, transparent and high performance inventory.” Pixalate is a non-JICWEBS certified tool used post-bid on a sample of 25% of impressions.</p> <p>“AdRoll employs the use of a blacklist in order to block flagged URLs from serving ads across all inventory. Additionally, if an advertiser wishes to block their ads from serving on a specific URL, the dedicated account manager will follow up on this request and has the ability to block individual URLs/bulk lists of URLs if requested.”</p>

Good Practice Principles	Description of compliance with the Principles
<p>5 Both Buyers and Sellers should understand any contractual consequences should they fail to monitor this process and respond appropriately to ad misplacement via take down.</p>	<p>AdRoll's takedown policy is included in their Brand Safety Policy on their website and states:</p> <p>"AdRoll is committed to provide quality inventory. If a client raises written concern about a website to their account manager we will review all reporting for that domain and remove the client's ad within 48 business hours. The consequences of any ad misplacement will be agreed on a case by case basis with the buyer."</p>

<p>Statement of verification provider:</p>	<p>We have reviewed AdRoll's policies and procedures for minimising ad misplacement in accordance with the JICWEBS DTSG Good Practice Principles. Our enquiries were designed to independently confirm that the brand safety policies stated have been implemented and clearly documented where required. Our review did not extend to testing the effectiveness of any processes, procedures or controls for ad misplacement.</p> <p>In our opinion, at the time of our review, AdRoll had established policies to minimise ad misplacement as described in the JICWEBS DTSG Good Practice Principles.</p>
